

**DETAILED ACTION**

1. Acknowledgement is made of the amendment received on 3/10/09.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lucinda G. Price on 3/19/09.

The application has been amended as follows:

In claims:

- (1) Claims 10 -12, 15 and 22 are CANCELLED.
- (2) In claim 16, line 2, insert "generated by a spread spectrum encoder" after - - an encoded data stream - - ;
- (3) In claim 16, line 3, delete "and" after - - Pseudo Noise (PN) codes - - ;
- (4) In claim 16, line 9, insert "and" after - - being transmitted - - .

***Allowable Subject Matter***

3. Claims 4, 5, 6 and 16-21 are allowed.
4. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: The prior art of

record Raphaelli (US 2004/0202229 A1), Tsubouchi et al (US 6061342) and Van Driest (US 6115411) do not teach or suggest a slip encoder configured to encode other multiple different data values into the encoded data stream by varying time spacing between the spread spectrum codes, wherein the other data values correspond to an amount of clock periods inserted by the slip encoder between the generation of adjacent spread spectrum codes so that generation of the entire spread spectrum codes are completed and then time gaps of varying duration with no spread spectrum codes are inserted before starting generation of adjacent subsequently transmitted spread spectrum codes, where an entire total amount of the time gap from an end of transmission of the entire spread spectrum codes to a beginning transmission of the next subsequently transmitted adjacent spread spectrum code corresponds to one of the other multiple different data values that is not spread spectrum encoded and different durations of the entire total time gap used between different pairs of the adjacent spread spectrum codes represent different values for the multiple different data values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to HELENE TAYONG whose telephone number is (571)270-1675. The examiner can normally be reached on Monday-Friday 8:00 am to 5:30 pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Liu Shuwang can be reached on 571-272-3036. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
